Embrace New Economy

How Things Work and What We Can Do About Them

Adam Rosman

- Don't idealize tools & trends.
- Use them as stepping stones; wrap them into your development/working environment (repeatable).
- Don't be rigid. Rigidity is a thin bubble waiting to be burst.

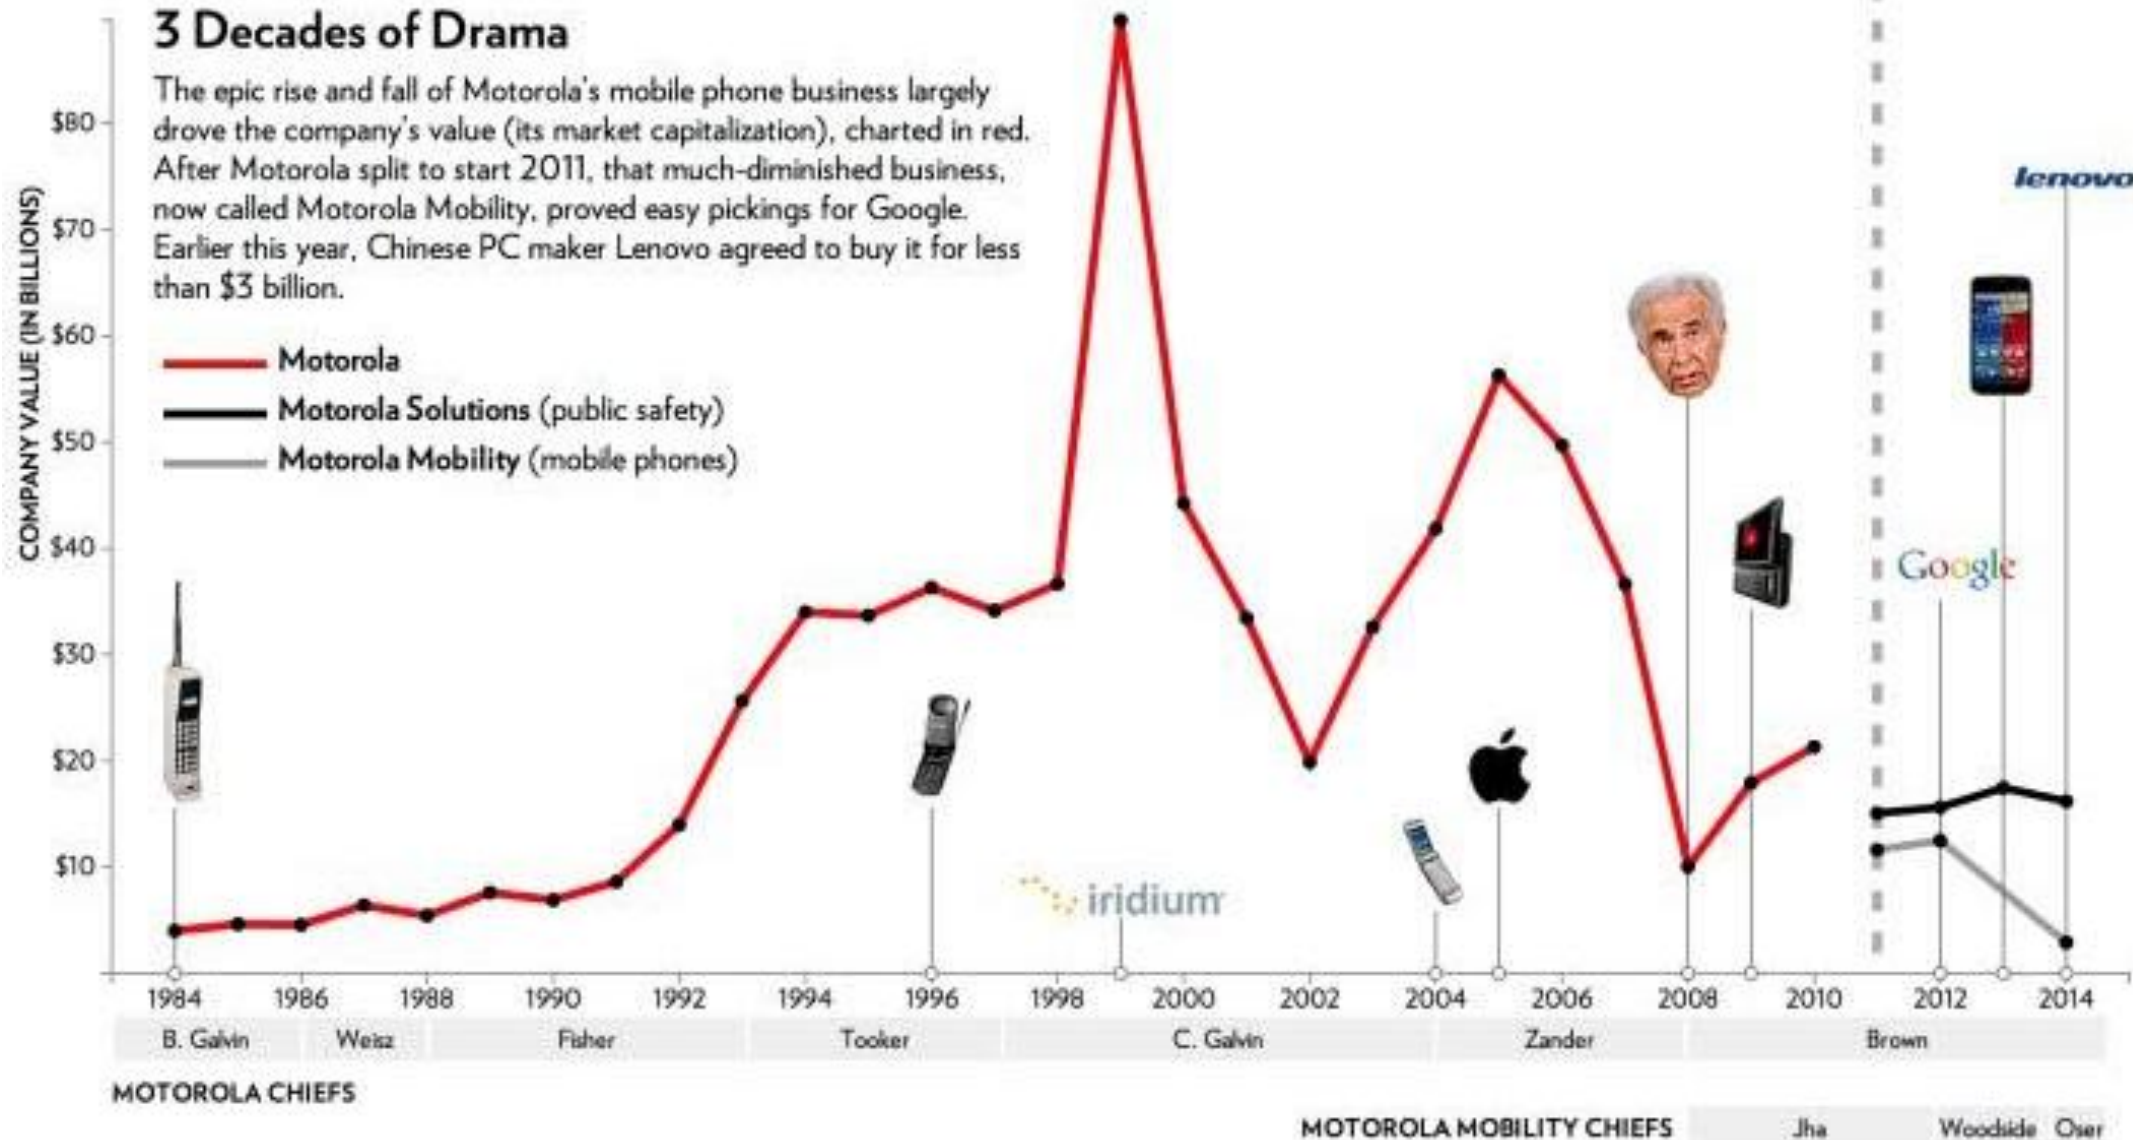

Three companies as case study:

- Motorola
- Canva
- Palantir

For further study, look at unicorn companies in Malaysia vs Indonesia vs Singapore.

3 Decades of Drama

The epic rise and fall of Motorola's mobile phone business largely drove the company's value (its market capitalization), charted in red. After Motorola split to start 2011, that much-diminished business, now called Motorola Mobility, proved easy pickings for Google. Earlier this year, Chinese PC maker Lenovo agreed to buy it for less than \$3 billion.

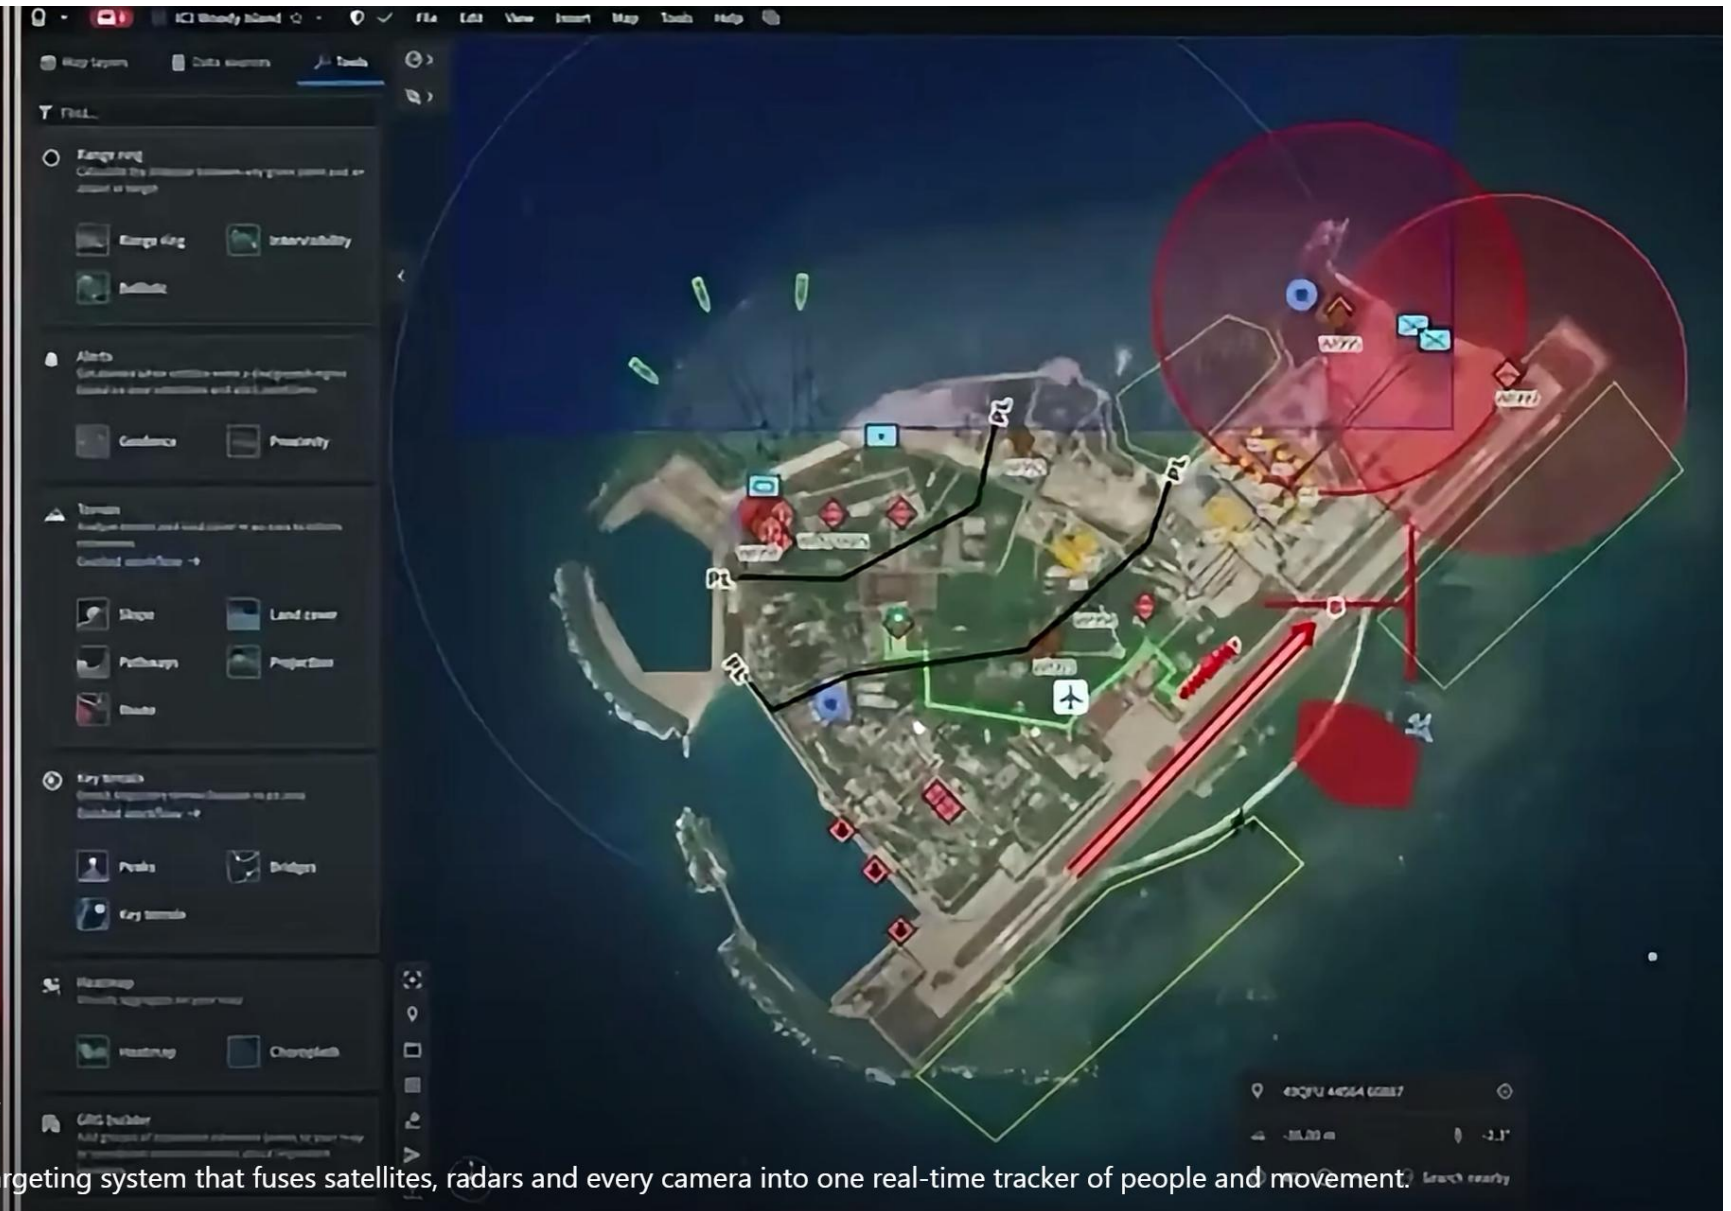

The rise of Canva: From startup to industry leader

So, how did Melanie Perkins start Canva? After five years of pitching to investors, facing countless rejections, and pivoting engineers, the team finally launched the platform in 2013. Melanie Perkins was only 26 years old when she became co-founder and CEO of Canva.

However, her initial joy was short-lived as a journalist broke the embargo and wrote negative reviews about Canva, shattering Melanie's world. Despite this setback, Canva eventually picked up steam and began attracting positive attention from the press and community worldwide. The platform's growth has been nothing short of phenomenal as Canva continues to expand its reach globally.

Since then, Canva has achieved great success, securing multiple investment rounds from various investors, including Felices, Blackbird Ventures, Sequoia Capital China, T. Rowe Price, and many others.

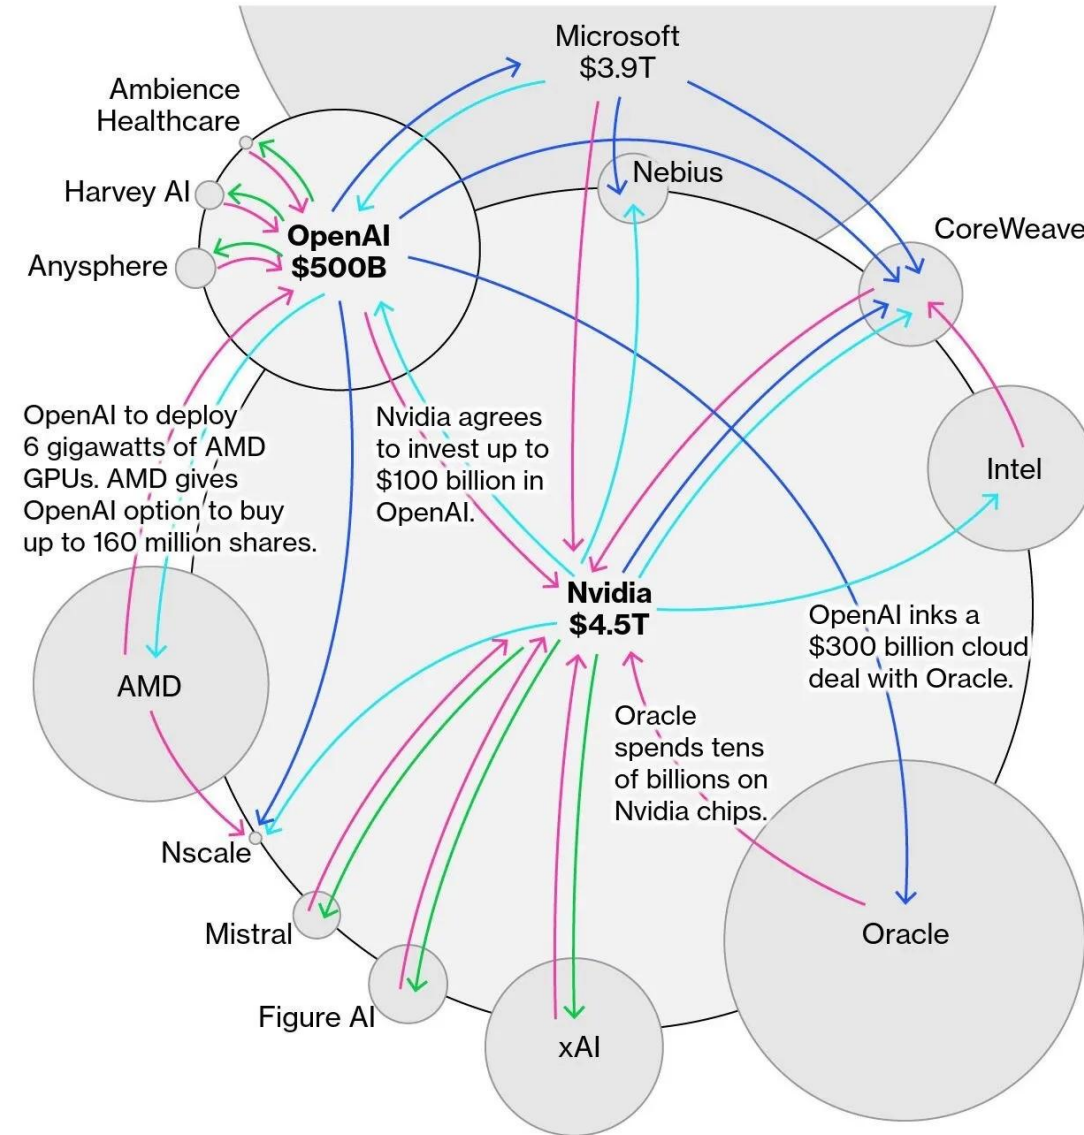

Led by the three founders, Melanie Perkins, Cliff Obrecht, and Cameron Adams, Canva has achieved incredible success. Its current estimated annual revenue is \$1 billion, and its dedicated team of over 3,400 employees is known as 'Canvanauts'. Its employees have given glowing reviews of the company on Glassdoor, with an overall employer rating of 4.4 out of 5, and 89% of reviewers are likely to recommend Canva to a friend.

Palantir released a new surveillance targeting system that fuses satellites, radars and every camera into one real-time tracker of people and movement. [Learn more](#)

What's affected

Forage

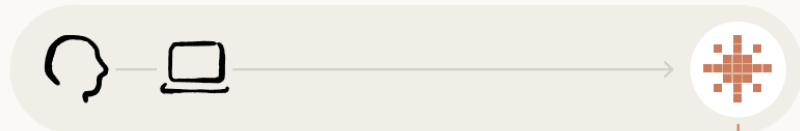

Department – more flexible, **optimize delivery & output**
Open for idea, not micromanaging

- Design system – resource arbitrage as ISO [standard]
- Design concept – aesthetic & value, look & feel, asset & style guide & context library
- Design principle – spec, product development stage; what we prioritize in delivery; what people should **perceive/experience** first

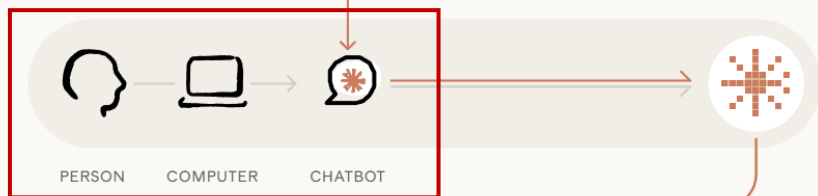

1. Vertical & horizontal
2. Time constraint
3. Billing
4. Compounding
5. Transferability & Impact
6. Communication
7. Implementation — before/after, end-user experience
8. Fairness & Justice

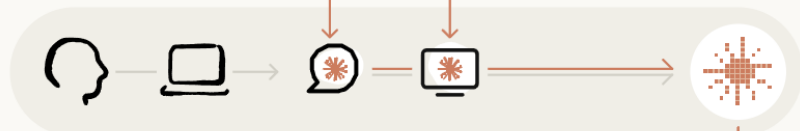

[Operation, workflow, fulfilment & expectation]

PERSON COMPUTER

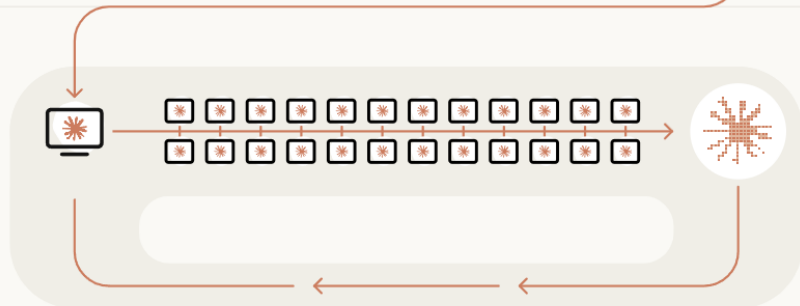

PERSON COMPUTER CHATBOT

PERSON COMPUTER CHATBOT AGENT

PERSON COMPUTER CHATBOT AGENT WORKERS

PERSON COMPUTER CHATBOT AGENT WORKERS

1. Listen
2. Consider
3. Keep it in mind
4. Ready to pivot
5. Act fast

Tools – practical

Method – vibecoding

Structure – agentic

Direction of AI economy

Bubble – everyone moves toward computation power

Cheaper

But need to remember:

Cost to pay: your privacy and identity are their leverage (you're the product)

It's a Ponzi scheme – everyone investing in each other

Our shared potential

Forage

Dawn Raid — Tun M

The Golden Triangle

— KL (commercial capital) · Cyberjaya (Silicon Valley) · Putrajaya (new government)

Cultural Diversity — social & cultural heritage

Tun Dr Mahathir made history as the first medical doctor to become Prime Minister of Malaysia. His medical background shaped his analytical approach, discipline, and problem-solving skills throughout his leadership journey.

“Nothing make sense until you do.”

Expose yourself to a new idea: look at what people are doing around you.

Plan your exit.

Question what's been given to you — out of curiosity, for your own good (you're the stakeholder of something/someone).

“Stay true to potential.”
